

How Do You Start?

OCRRA's proven 3-step process to help you start food scrap composting:

1. Schedule a Planning Meeting with OCRRA

We'll help you estimate your current food scrap volumes and find out how much you can reduce your trash through food scrap separation.

Contact us at (315) 453-2866 or info@ocrra.org.

2. Contact Your Waste Hauler

OCRRA accepts organics at less than \$0.02 per pound (less than half the cost of normal trash disposal). Ask your trash and recycling hauler to recommend a **cost-effective organics transport solution** to the Amboy Compost Facility - for all those organics that will no longer require disposal as trash!

3. Arrange for Employee Training through OCRRA

OCRRA provides on-site training at no charge. OCRRA recycling specialists and your waste hauler will meet with your team to maximize organics recovery and provide informative posters/decals.
