RE: Response to Questions from OCRRA's Request for Bids for Recycling Collection Containers and Hauling Services at OCRRA's Transfer Stations to Local MRF

Responses to all questions received from the "Request for Bids for Recycling Collection Containers and Hauling Services at OCRRA's Transfer Stations to Local MRF" are as follows:

Q1: On the price quote sheet there is a third option of bulky rigid plastics....is there a facility for this, and, if so, where is it located??

A1: If OCRRA elects to collect bulky rigid plastics at its transfer stations, it is anticipated that the selected vendor would be directed to transport those materials to the Recycle America facility located at 4550 Steelway Blvd S, Liverpool, NY, 13090. At this time, no determination has been made whether to proceed with such collection.

Q2: What consideration is given to a bidder for the Environmental Impairment Liability? Does the bidder still have to be low bidder or can they be higher than the lowest and still have bid awarded to them?

A2: The Agency will select the lowest responsible bidder. If two bids are received proposing the same price, and such price is the lowest price received, the Agency will then give preference to the lowest responsible bidder that possesses Environmental Impairment Liability Insurance.

PLEASE NOTE: Bids are due Tuesday, February 27, by 2:00 p.m.
