

## Equipment Maintenance Supervisor

Join OCRRA's team as the Equipment Maintenance Supervisor. This position oversees and inspects work in the maintenance and repair of a variety of diesel equipment including loaders, excavators, material handlers, shredders, tractor and trailers and dump trucks. Responsible for fleet and heavy equipment management including inventory control, scheduling of preventive maintenance and inspections and parts and equipment procurement. Strong diesel mechanic knowledge with up-to-date skill on diagnostics, shop safety and DOT regulations. Critical thinking, strategic planning, excellent computer skills and effective supervisory and communication skills are keys to success in this opportunity.

Qualified candidates must possess seven (7) years of professional level work experience, or its part time equivalent, in the maintenance and repair of diesel motor equipment and heavy equipment, four years of which must have been in a supervisory capacity.

The position is a provisional civil service appointment. Salary for this position is in the range of \$65,000 to \$75,000 DOE. Qualified candidates should submit an application, resume and letter of interest. Applications can be obtained on the Employment page at [OCRRA.org](http://OCRRA.org) and will be accepted until May 31, 2022.

OCRRA is an equal opportunity employer.
