

ONONDAGA COUNTY RESOURCE RECOVERY AGENCY

ANNUAL REPORT ON RECYCLABLES RECOVERED: 2006

This report submitted pursuant to NYSDEC Permit Number 7- 3142-00028/00002-0, Certificate to Operate the Onondaga County Resource Recovery Facility; NYSDEC Permit Number 7-3156-00047/00001-0 Permit to Construct and Operate the OCRRA Landfill; NYSDEC Permit Number 7-3148-00048/00001-0 Solid Waste Transfer Station-Ley Creek and NYSDEC Permit Number 7-3142-00036/00001-0 Solid Waste Transfer Station-Rock Cut Road.

Period reported: January 1, 2006 through December 31, 2006
Date: March 1, 2007
Planning Unit: County of Onondaga including the City of Syracuse,
excluding the Town and Village of Skaneateles
Contact Person: A.T. Rhoads, Executive Director, OCRRA
100 Elwood Davis Rd. North Syracuse, NY 13212-4312

1.0 Mandatory and Voluntary Recycling in 2006

In 2005, OCRRA's volunteer board of directors established the following vision for the Agency: **By 2010, OCRRA will be recognized as a world leader in local waste disposal and recycling solutions, making our community one of the best places to live and work.** Throughout 2006, significant progress was made in several areas towards achieving that vision. Many of those achievements are addressed in this report.

A mountain of material was recycled through the residential curbside recycling program during 2006. The total: 42,235 tons. That continues the superb 16 year record of the community's Blue Bin curbside recycling collection. It's Onondaga County's greatest team effort, and it all adds up to a win for both the environment, and for controlling waste disposal costs.

In 2006, approximately **690,000 tons were recycled** through mandatory and voluntary recycling in the community, **for a recycling rate of 66%**. (Table 1) For the tenth consecutive year, OCRRA met the NYSDEC permit goal that calls for a least 40% processible recycling with a **44% reduction** in the processible Municipal Solid Waste (MSW) within the service area. In this category, mandatory curbside and commercial recycling totaled **239,000 tons**. (Table 2).

Above: Students at Frazier Middle School in the Syracuse City School District play a key role in recycling. Frazier, and most City of Syracuse School District schools, adopted the "Go Green Initiative" to encourage environmental responsibility and activism. OCRRA supported the initiative through the purchase of 400 T-shirts; subsidized class trips to local recycling facilities; and OCRRA's Recycling Specialists donated hundreds of hours to help start GGI in Syracuse. In 2006, OCRRA gave out thousands of brochures and hundreds of Blue Bins to aid recycling in all County schools.

Table 1 - OCRRA 2006 Recycling and Solid Waste

	Tons (000's)	Percent
Recycling:		
Curbside Recycling (Primarily Residential)	42.2	
Commercial Recycling (Primarily Business)	647.7	
Total Recycling	689.9	66%
Solid Waste:		
Incoming Municipal Solid Waste (MSW)	312.8	
Less MSW Ferrous Recycling	(9.3)	
Incoming Construction & Debris (C&D)	55.5	
Total Solid Waste	359.0	34%
Total Recycling and Solid Waste	1,048.9	

Table 2 - OCRRA 2006 Processible Recycling and Municipal Solid Waste

Processible materials are those which could have been disposed of in the Waste-to-Energy Plant.

In 2006, 44% of processible materials were recycled.

	Tons (000's)	Percent
<u>Processible Recycling:</u>		
Curbside Recycling (Primarily Residential)	42.2	
Processible Commercial (Primarily Business)	197.0	
Total Processible Recycling	239.2	44%
<u>Municipal Solid Waste:</u>		
Incoming Municipal Solid Waste (MSW)	312.8	
Less MSW Ferrous Recycling	(9.3)	
Total MSW less MSW Ferrous	303.5	56%
Total Processible Recycling and Solid Waste	542.7	

Notes: 1. When calculating recycling rates, ferrous recovered from MSW is subtracted to avoid double counting.

2. Sources for this data include recycling companies, retail and commercial firms and governmental organizations which voluntarily report to OCRRA. Reported data has been adjusted to eliminate known double-counting. For example: If Generator A ships 500 tons of scrap metal to Recycler B and both organizations report 500 tons to OCRRA; OCRRA credits the system-wide total with 500; not 1,000, tons.

OCRRA inventories and records recycling tonnages of all material, mandated and non-mandated, which is diverted for recycling through the efforts of the curbside program, private sector commercial and industrial entities, public and private institutions. Material items include, but are not limited to: bulky metals (scrap autos are not counted), food waste (composted), textiles, unique plastics, sludge, oils and wood. Deposit beverage containers are also reported in the recycling tonnage above.

Table 3 - Mandated Recyclables in 2006 are as follows:

Residential:

Newspapers, Magazines, Catalogs
 Home Office Paper and discarded Mail
 Milk and Juice; Gable-top Cartons, Aseptic Cartons
 Glass; Food and Beverage Containers
 Metal; Food and Beverage Containers including foil
 Plastic Bottles; #1 and #2
 Aerosol Cans
 Corrugated Cardboard, brown Paper Bags, Paperboard, Pizza Boxes

Commercial:

All Office Paper
 Corrugated Cardboard
 Paperboard
 Blue bin items (if economically justified)

Pictured above; Mr. Antonio Pinti, holding his Recycling Champion award from OCRRA, outside his “M Street” business on the Syracuse University Hill.

OCRRA’s Recycling Specialists help businesses, schools, apartment complexes and organizations throughout the community develop top-notch recycling programs.

ABOVE: OCRRA team members joined thousands of other volunteers as part of the Agency’s Earth Day Litter Clean Up. Over one million pounds of litter have been removed from our community since the program began over a decade ago, thanks to the volunteers from throughout the county.

BELOW: OCRRA distributes blue bins at special community events throughout the year.

Table 4 - OCRRA 2006 RECYCLING, BY COMMODITY (Thousands of Tons)

<u>COMMODITY</u>	<u>TONS (000's)</u>	<u>Pct of Total</u>
<u>Organic Wastes, except Papers</u>		
Food - Industrial and Commercial	146.4	21.2%
Yard Waste	38.8	5.6%
Wood	26.6	3.9%
Textiles	4.5	0.7%
Plastics	6.9	1.0%
<u>Total Organic</u>	<u>223.2</u>	<u>32.4%</u>
<u>Metals</u>		
Ferrous Metals, except MSW Ferrous	137.5	19.9%
MSW Ferrous	9.3	1.3%
NonFerrous Metals, except Aluminum	8.2	1.2%
Aluminum	12.6	1.8%
<u>Total Metals</u>	<u>167.6</u>	<u>24.3%</u>
<u>Paper</u>		
Corrugated Cardboard and Kraft Bags	76.0	11.0%
Newspapers and Magazines	34.4	5.0%
Office / Mixed Paper	37.8	5.5%
<u>Total Paper</u>	<u>148.2</u>	<u>21.5%</u>
<u>Sludge (D/S and Papermill)</u>	<u>113.1</u>	<u>16.4%</u>
<u>Other</u>		
Glass	10.3	1.5%
Special & Hazardous Wastes ¹	5.9	0.9%
Electronics and Batteries	3.5	0.5%
Appliances (Most counted in Metals)	0.1	0.0%
Miscellaneous	17.9	2.6%
<u>TOTAL</u>	<u>689.9</u>	<u>100%</u>

1. The reporting of this data to OCRRA is voluntary. In particular, in the category "Special and Hazardous Wastes" many businesses consider the tonnage and disposal of their special processes wastes, whether or not it is "hazardous", to be proprietary information. Therefore, OCRRA believes the data we receive concerning the recapture and recycling of waste, especially in this category, may likely be underreported.

2.0 2006 Recycling Programs Cost Approximately \$1,658,200

OCRRA manages the solid waste and recycling program for 33 municipalities in Onondaga County. Each municipality is unique in its solid waste collection. Some provide waste and recyclables collection through their own public employees, some contract with private waste hauling firms to provide services for their residents and still others require residents to arrange for disposal and recycling by contracting with a private hauler or bringing their MSW and recyclables to one of the two OCRRA transfer stations. OCRRA maintains two drop-off centers for waste and recyclables; each accepts recyclables at no cost.

OCRRA's trash tipping fee revenue provides the financing for critical recycling program components essential to achieving the mandated recycling rate. OCRRA is not funded by taxation. OCRRA does apply for, and occasionally wins, government and private grants through competitive application. Waste and recyclable hauling costs are not part of OCRRA's service costs.

Program costs include OCRRA's Operation Separation comprehensive public education program. The program consists of: radio, TV, billboard, and print media campaigns; on-site visits to waste generators by a staff of recycling professionals offering technical assistance; classroom presentations by a New York State certified school teacher; and numerous brochures and teaching materials.

The OCRRA recycling program arranges for the collection, processing and marketing of residential recyclables and covers costs necessary to assure waste haulers a zero tip fee for residential recyclables. OCRRA also provides two drop-off centers for the collection of blue bin recyclables for those without curbside service. The drop-off stations are also collection points for additional materials such as: paper from small offices/home offices; scrap metal; small appliances and household batteries.

During 2006, OCRRA's Operation Separation Program managed:

- Two yard waste compost sites; open to the public six days per week, from April to November.
- Three "Household Hazardous Waste" (HHW) collection days;
- Four "Household Computer and TV set" collection days;
- A collection and recycling event for hard-cover and soft-cover books during two weeks in July;
- Our second no-charge collection day for air-conditioners, dehumidifiers and propane tanks in June;
- Our third annual "Shred-o-Rama". Two companies stationed their mobile shredding trucks at Shoppingtown Mall and shredded household and small business confidential papers in October;
- The year-long collection of batteries through a network of local drop-off points, including curbside collection of household batteries in July;
- A mercury thermometer and thermostat exchange program;
- OCRRA also administered special services and programs for businesses, schools, and apartment building managers and owners, each at a cost to OCRRA.

Direct program costs in 2006 (*unaudited*), associated with the recycling services are as follows:

<u>Table 5 – Expenses by Program</u>	<u>Expense</u>
Recycling Personnel	\$377,485
Material Recovery Facility (MRF) Fees	68,668
Public Education - Outside Service	451,634
Composting	49,728
Household Hazardous Waste (HHW) Collection	195,107
Blue Bin Expense	247,020
Computer and TV Collection	46,318
Other recycling programs	222,240
Total Cost – 2006	\$1,658,200

“Blue Bin” recyclables are collected at the curbside by private haulers, municipal haulers, and municipalities with private hauling contracts. The recyclables are taken for processing and marketing to a material recovery facility, or “MRF”.

In 2005 OCRRA secured the renewal of a 5-year contract agreement, 2006 through 2010, between OCRRA and two local, private MRFs. This contract reduces the Agency’s annual risk in connection with payments to the MRFs for material processing, potentially generates income for the Agency under favorable market conditions, and provides certainty and stability for the community’s recycling system, even during commodity market lows.

As a result of OCRRA’s contract, the MRFs accept the recyclables at no charge to the waste haulers. The MRFs then sort, bale and market the residential recyclables.

The MRF contract is a valuable tool which allows OCRRA to formulate and maintain a reasonably uniform definition of “Blue Bin” recyclables. The contract also encourages stability in the local market for recyclable commodities, thus attenuating the variation in global market demand and pricing. This uniformity of definition and marketplace stability significantly facilitates the successful education and enthusiastic cooperation of the public.

OCRRA's MRF payments for the period January 1, 2006 through December 31, 2006 totaled \$68,668. MRF payments under the new contract depend on the market prices of old cardboard (OCC) and newspaper (ONP). In prior years, the Agency’s payments were conditioned on market prices for a basket of recyclable materials; OCC and ONP plus “tin cans”, aluminum cans, glass and HDPE and PETE plastics.

Prices for contractual commodities in December, 2006 and prior years are charted below. Prices for OCC and ONP were strong for most of 2006, and therefore OCRRA’s MRF payments were low.

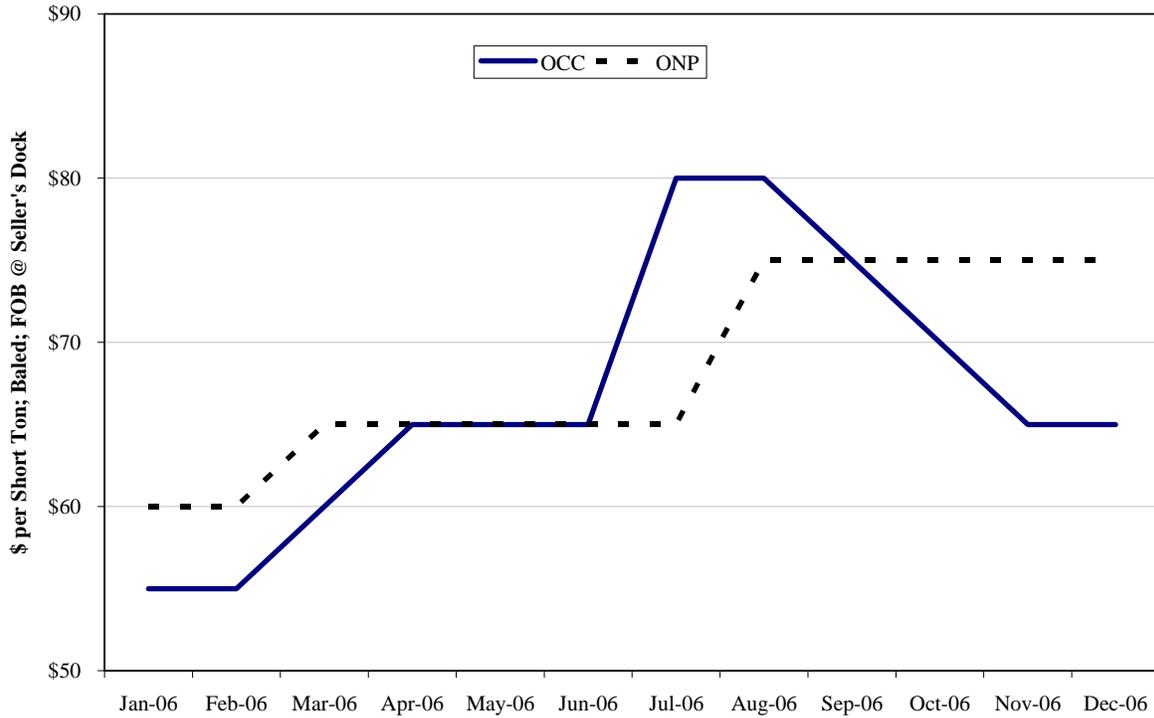

<u>Table 6 – Market Values by Commodity</u>	Year End Market Value				
	(Dollars per Ton)				
	(After sorting, processing, densification)				
<u>Commodity</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>	<u>2002</u>
Newspaper (ONP) & Magazines (OMG)	\$75	\$60	\$75	\$60	\$70
Corrugated Cardboard (OCC) & Kraft Paper	\$65	\$55	\$75	\$55	\$60

.....

Prices for ONP and OCC are based on the Official Board Markets (Buffalo high)

Taking into consideration the value of the commodities in the blue bin, OCRRA pays the MRF for processing and marketing residential recyclables using a formula adopted with the new contracts beginning in 2006. Each month, OCRRA pays the MRFs an administrative fee of \$1.50 per ton for the processing and marketing of the residential recyclables collected under the mandatory program. Additional payments may be made from/to OCRRA depending on the market prices of OCC and ONP: consistent prices below \$40/ton may require an additional payment from OCRRA to the MRFs; market prices above \$80/ton may require a payment to OCRRA from the MRFs. OCC and ONP market prices fluctuated between \$50/ton and \$80/ton throughout 2006.

**Transacted Stock Paper Prices in 2006
Monthly "Buffalo High"**

OCRRA's 2006 MRF expense was \$6,000 less than the previous year. As can be seen in Table 7, the last 3 years of favorable market conditions for recyclable commodities required significantly lower MRF expenses than in 2001 to 2003. Fluctuations in the commodity markets are difficult to predict from year to year. Consequently, recycling program costs are vulnerable to rapid and unforeseen changes in MRF costs. With the new MRF contract, effective in 2006, OCRRA has achieved its objective of reducing its potential financial risk in connection with annual MRF costs; with the previous contract, the financial risk was essentially limitless.

TABLE 7

<u>YEAR</u>	<u>Total MRF Payments</u>
2001	\$432,000
2002	\$334,970
2003	\$173,347
2004	\$19,804
2005	\$74,727
2006	\$68,668

3.0 Public Education, Program Outreach and Enforcement

OCRRA continues to enforce the Local Law mandating source separation for recycling through a system of public education, outreach and surveillance.

OCRRA's Operation Separation recycling specialists call on apartment buildings having more than 5 units to ensure compliance with the recycling law and to assist in designing effective collection systems for recyclables. During 2006, OCRRA continued to provide free, high visibility decals to be affixed, with the permission of the waste hauler, to recycling totes and dumpsters. We also delivered over 8,000 mini-blue bins for apartment renters. (Photo right)

OCRRA's Operation Separation business recycling specialists follow through on inquiries and complaints about business recycling. They are on the road 5 days a week calling on institutional, industrial and commercial businesses. In 2006, OCRRA's business recycling specialists visited hundreds of local businesses and schools to offer assistance in designing recycling programs and our free recycling decals and containers.

IS YOUR BUSINESS RELOCATING?

If you are relocating your business, OCRRA asks that you please make the special effort to see that discarded papers and files as well as all those cardboard boxes are recycled. If file security is a concern, call one of the shredding companies listed in the phone book. They will shred your papers and deliver the confetti to a recycler. (Note: 4 local, commercial, mobile-shredding companies: Proshred Security; Confidata; Iron Mountain; and Northeast Mobile Shredding have provided trucks and personnel at no charge for OCRRA's free "Shred-O-Rama" events.)

And don't forget to give OCRRA a call. We can supply you with the free recycling containers and information you will need at your new location. So join Enable, Critical Link, Aspen Dental and many others who relocated this year and went the extra mile to recycle.

When needed, an enforcement officer supplements the efforts of the business and apartment recycling specialists. An enforcement officer calls on businesses and apartment buildings when it is determined that other approaches have not resulted in cooperation. Each enforcement officer spends a significant portion of the week inspecting loads of solid waste at the waste-to-energy plant looking for loads containing recyclables and issuing warnings and/or violations. Pictures are taken of the loads and the waste hauler must identify the origin of the waste. Then the business or apartment recycling specialist calls on the waste generator to determine the source of the problem and assist in designing a recycling program which will capture the mandated recyclables.

Every year a significant percentage of the population needs to hear the recycling message for the first time. Every year we wish to reinforce our recycling message among those who have heard it before. And, every year, we need to inform the public of our special events.

In 2006, approximately \$451,634 was spent on direct public education through radio, TV, and print media campaigns. OCRRA also conducted extensive market research in 2006 to better understand the messages that we need to reinforce among our audiences.

OCRRA also employs a six-person, professional recycling team engaged in spreading the recycling message and bringing all levels of technical assistance to the residents, schools and businesses in the OCRRA service area.

Our recycling educator, a New York State certified teacher, spoke to over 12,000 local students.

In addition to paid media advertising, OCRRA also publishes a newsletter, *Operation Separation Update*, that goes out to approximately 55,000 residents each quarter.

The Agency's website, www.OCRRA.org, provides extensive recycling and waste reduction information, as well as recycling instructions in Spanish. Online registration for household hazardous waste collection and various other events such as Earth Day is also available on the OCRRA website.

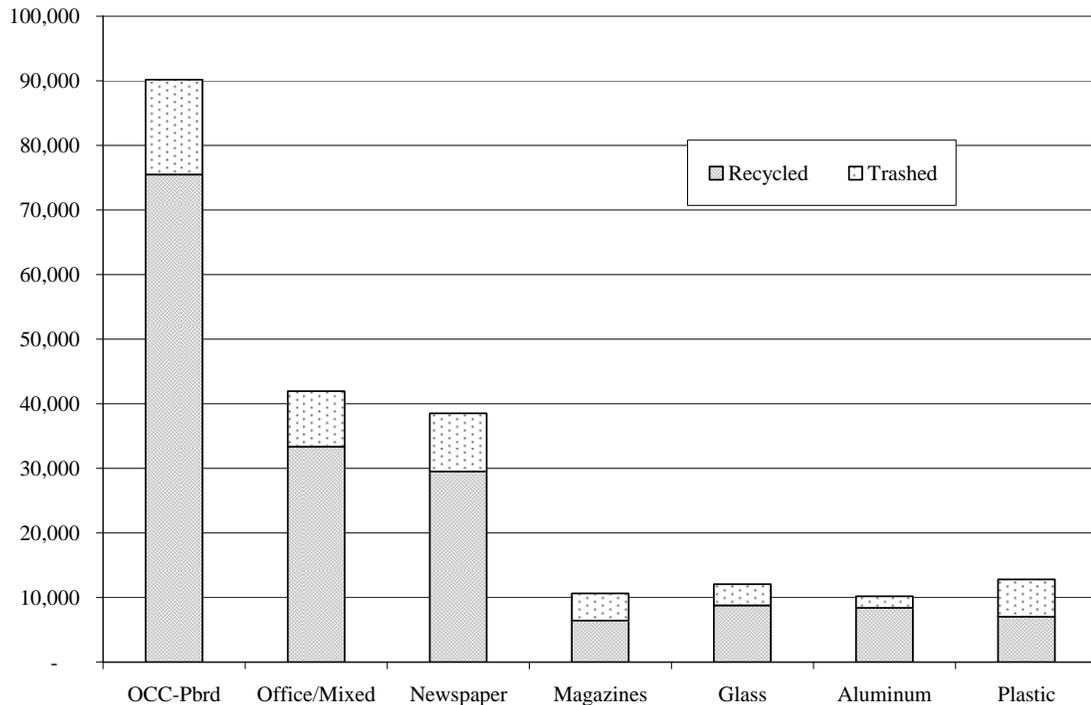

OCRRA's Recycling Team prepare to drop-off blue bins in the Westcott Street neighborhood (right). The Team made several drop-offs in City neighborhoods to encourage participation in the curbside collection program.

OCRRA also gave away blue bins during special events in Nojaim's Supermarket off West Street in the City and at the P&C Plaza in the City's Valley neighborhood.

In September 2005, OCRRA conducted a Waste Quantification & Classification study to measure the composition of two components of the waste stream: curbside recyclables, 44,600 tons/year in 2005, and MSW, 261,000 tons/year, brought to the Agency's Waste-to-Energy plant. Samples from these streams were sorted, as delivered, into 50+ categories. Similar studies in 1993 and 1998 have been used to inform decisions such as the expansion of the list of mandatory recyclables and public communications. The 2005 study allows us to explore trends such as an increase/decrease in PETE/Glass beverage containers in the waste stream and to baseline the Agency's initiatives to Reduce, Reuse and Recycle. The main finding of the study was that among mandatory recyclable materials, the lion's share (78%) of the tonnage is indeed being recycled. However, there is still almost 37,000 tons of fiber (cardboard, office paper, newspaper and magazines) and 11,000 tons of containers (glass, plastic and aluminum) being trashed.

**Total Tons Recycled or Trashed, Residential & Commercial
Onondaga County, 2005**

At our Board's request, the Agency conducted extensive market research at the State Fair and via focus groups and telephone surveys with RMS Research to explore the behavioral issues behind this opportunity to do better. We refined the educational message we need to deliver to our constituents, and the Board has hired ABC Creative to create a new, public education campaign to air in 2007. The research found two major issues which need to be addressed: First, recycling has become a bit passe' and ABC Creative's new campaign will attempt to refresh the enthusiasm and commitment of our community to recycling. Secondly, there is a high correlation between the rate at which a material is being recycled and the awareness among the community that this material is indeed recyclable. Our new campaign will be reinforcing the "recyclability" of specific materials such as magazines, junk mail, plastic bottles, etc.. (NOTE: A third theme developed from the research was that OCRRA has a sterling reputation as a Recycling Agency). This research, combined with public and customer feedback, and integrated into the strategic planning process will help OCRRA plan programs and services to improve recycling success and reduce waste well into the future.

4.0 Highlights of the 2006 OCRRA Operation Separation Program

➤ COMPOSTING

Almost 25,000 visitors were served at the Agency's yard waste compost sites located in Jamesville and Camillus. Approximately 5,100 cubic yards of compost and 8,000 cubic yards of mulch were produced at the sites. The program's direct costs were approximately \$49,728; excluding allocated salaries of permanent employees.

Annually, residents purchase a car-window sticker for \$10 which allows them to drop-off yard waste and take away compost during the year. In 2006, over 3,000 stickers were sold. Additionally, commercial users paid approximately \$9,000.

A lease with the City of Syracuse Dept. of Public Works allowed the DPW to use a grinder which OCRRA purchased with a 50% grant from NYSDEC, at no charge. In exchange, the City provided the necessary labor to maintain the grinder. It is a great partnership.

As part of our Strategic Plan, OCRRA is seeking a long-term leasing arrangement with Onondaga County so that the Agency can begin some much needed improvements to our two compost sites. This will allow for better service to our existing customer base and provide pilot sites for testing new programs such as bio-fuel and food waste composting programs.

➤ HOUSEHOLD HAZARDOUS WASTE DAYS

Household Hazardous Waste Days continue to be one of the most popular services the Agency offers. Three HHW Days were held in 2006, serving over 3,000 households.

Direct costs included: the fee charged by the vendor to conduct the event; battery and propane cylinder handling; lab fees for testing the paint collected; Strathmore Paint's charges to reformulate and package the paint for the paint give-away to municipalities and human service agencies. Indirect costs included the OCRRA personnel to work on the day of the event as well as the countless hours beforehand; advertising the events, taking reservations, recording and sending out information/confirmation packets to each of the more than 1,000 households who made appointments for each event. In 2006, OCRRA held a special, Friday afternoon, neighborhood HHW collection in the City's Kirk Park.

OCRRA has been awarded a \$321,000 NYSDEC grant to cover nearly 50% of certain direct costs of the HHW events for 2006 and 2007. Total direct costs in 2006 for this valuable community program were approximately \$195,107.

➤ **HOUSEHOLD COMPUTER AND TELEVISION RECYCLING DAYS**

The EPA reports that electronics are the fastest growing portion of America's trash. The EPA estimated that 250 million computers became obsolete by the year 2005, and that more than 3.2 million tons of electronic waste will find their way into thousands of landfills across the country.

To encourage the safe management of old computers, OCRRA takes the environmentally sound approach of removing computer equipment from the waste stream by implementing a household computer recycling program. In 2003, OCRRA expanded its computer recycling program to include TV sets. The program ensures that material, which cannot be recycled or reused, will be disposed safely at an approved site. Since the program's inception, we've collected almost 1.3 million pounds of e-waste.

Onondaga County residents were able to drop off old computer equipment and TVs at the Ley Creek Transfer station at 4 events, once each quarter, in 2006. The agency accepted 2 computer systems per household each day. Over 400,000 pounds of old computer equipment and TVs were collected in 2006, comprised of:

3,631 monitors	227 laptops
3,259 computer towers	1,144 mice
1,779 printers	309 scanners
2,141 keyboards	2,133 TVs

The direct program costs to OCRRA were over \$46,318. Indirect costs included the OCRRA personnel to work on the day of the event as well as the behind the scenes activities such as: advertising the events and answering telephone inquiries requesting information. OCRRA is hoping to begin a short-term lease of roughly 9,000 sq. ft. of centrally located, commercial warehouse-type space to create a "Recycling Events Center". We will be testing the community's reaction to the continuous collection of books, electronic and other non-hazardous wastes. Currently, we collect these materials as "Special Events".

➤ **BATTERY COLLECTION**

County residents can drop off their old batteries at area Wegmans grocery stores; the Kinney drug store in Tully and the Noble Ace Hardware store in Elbridge. In addition, OCRRA maintains two Drop-off centers at its transfer stations and there is an annual July curbside collection of batteries.

Almost 75,000 pounds of batteries were collected and recycled or safely disposed in 2006 at a cost of approximately \$28,750, excluding allocated salaries of permanent employees and support activities such as advertising and transportation costs incurred on our weekly pick-ups from the battery bins at our partner's stores.

➤ BOOK RECYCLING

In 2006, County residents, businesses, and schools could drop off their old hard-and soft-cover books at a rented warehouse in Syracuse for two weeks in July. The program was a tremendous success, resulting in the collection of 176,000 pounds of old books. Many community groups volunteered their time to examine and to retrieve discarded books in good condition that could be used by the groups they serve. OCRRA also encourages “grass-roots” opportunities for book recycling at community libraries, book swaps, school sales, etc., by promoting these events on our website, in press releases and in our quarterly newsletter.

➤ MERCURY THERMOMETER EXCHANGE PROGRAM

OCRRA continued a mercury thermometer exchange program at the Rock Cut Road Transfer Station. The Agency teamed up with Bristol Myers Squibb and Onondaga County Department of Water Environment Protection to provide residents with non-mercury thermometers in exchange for mercury thermometers. The mercury thermometers that were collected were then properly disposed as part of the Agency’s household hazardous waste collection program. The mercury thermometer exchange program helps prevent mercury contained in household thermometers from escaping into the environment when the thermometers are broken or thrown away. In 2004, mercury thermostat collection was added to this program.

➤ RECYCLED PAINT GIVE-AWAY

The Agency continued our direct mail campaign to reach out to hundreds of community organizations, inviting them to use recycled paint from OCRRA’s Household Hazardous Waste Collection. As a result, over 1,425 gallons of recycled/reprocessed paint were provided to dozens of non-profit agencies, municipal entities, park systems, and other human service organizations. OCRRA conducted the paint give away July and November. Organizations receiving the recycled paint include: the Spanish Action League, Village of Jordan, Assumption Church, City of Syracuse Department of Parks and Recreation, Onondaga County Parks, LaFayette Central School District, Sacred Heart Basilica, Ray of Hope Church, Rescue Mission, SUNY ESF, Habitat for Humanity, Oxford Inn, Coast Guard Auxiliary, Town of Salina and the Onondaga Nation.

➤ THIRD ANNUAL COMMUNITY SHRED-O-RAMA

Over 943 households dropped off almost 55,000 pounds of paper at OCRRA’s Shred-O-Rama at Shoppingtown Mall in October. Paper was shredded on site by two, local, shredding companies, ProShred and Confidata, and then recycled. OCRRA also purchased a commercial vending machine for use by residents and installed it our Rock Cut Road facility.

➤ **AIR CONDITIONER AND PROPANE TANK COLLECTION DAY**

OCRRA held its second no-charge collection day for air-conditioners, dehumidifiers and propane tanks in June. Over 930 air conditioners were dropped off and the Chlorofluorocarbons (CFCs) were safely removed (CFCs in the upper atmosphere contribute to ozone depletion and heighten the “green house gas effect.”). OCRRA partnered with NYSERDA, the New York State Energy Research and Development Authority, to stage this event and share the staging costs. A collection of old propane tanks the same day netted over 1,100 old propane tanks for recycling.

➤ **FREECYCLING and ReStore**

What if “E-Bay”™ was free? It would probably work a lot like the **Freecycle Network**. The goal of the Onondaga County Freecycle Network is to reduce waste by connecting individuals who are throwing away goods with others who are seeking them. Whether you're looking to discard or acquire an item, Onondaga County Freecycle is the place to do it. Clothing, credenzas, canoes, computers, and all the little things in between may be available on the Network. Visit often, availability changes by the minute!

In 2004, Syracuse Habitat for Humanity, Inc. began accepting donations of recycled building materials for the **ReStore**, a home improvement resale store. If you are remodeling your home, or just cleaning out your garage, consider donating your leftover home improvement and construction materials. The idea is to help others improve their standard of living, while keeping usable materials out of the trash.

OCRRA strongly supports the goals and programs of the Freecycle Network and ReStore. Residents can link to the Freecycle Network and ReStore websites through our website, www.ocrra.org. OCRRA also promotes the Freecycle Network and ReStore at our community events and in our newsletter.

➤ **WASTE DISPOSAL COST RELIEF FOR LOCAL CHARITIES**

In 2006, OCRRA again provided a "recycling credit" to the Rescue Mission, Salvation Army, and Catholic Charities for each documented ton of material (clothing, furniture, etc) recycled through these human service organizations. These recycling credits, in the amount of \$10.00 per ton, were credited towards these organizations' monthly waste disposal fees through the OCRRA system, with certain limitations. In 2006, OCRRA provided these organizations with approximately \$87,800; effectively relieving them of most of their waste disposal costs. OCRRA's Board also approved a mini-grant program of up to \$300 per year for the purchase of commercial recyclables collection services by small charities and non-profits. The Boy Scouts, Girl Scouts, North Area Meals-on-Wheels and the Samaritan Center were among the groups that benefited from this program.

➤ **BOTTLE BILL LAW EXPANSION**

The return rates for deposit cans and bottles in Onondaga County ranged from 77 percent to a whopping 95 percent in a 1998 study. But the **discard** rates for non-returnable containers in Onondaga County, a national recycling leader, ranged from 68 percent to 87 percent.

OCRRA is taking a proactive role to change the discard statistics by supporting an expanded New York State bottle bill deposit law to include non-carbonated products such as water, juices, teas and sports drinks. OCRRA has obtained over 12,000 signatures from residents who support the expansion of the bottle bill through petition signings at various local events, such as the New State Fair and the annual flower and garden show. OCRRA also

encourages visitors to our web site, www.ocrra.org, to show their support of an expanded bottle bill by completing an online petition and writing their State Assembly member and Senator.

The Agency's Board resolution to expand the "bottle bill" underscores the Agency's commitment to the New York State solid waste management hierarchy, which emphasizes waste reduction, reuse, and recycling first, and then waste to energy, followed by landfilling. By creating a deposit for the additional bottles, we hope to see more of them recycled and fewer littering our neighborhoods and roadways.

OCRRA'S COMMUNITY EVENTS AND PUBLIC OUTREACH

OCRRA is committed to maintaining high levels of community participation in the Operation Separation recycling program. In 2006, OCRRA's recycling team were part of numerous area events and fairs, including the New York State Fair, the Flower and Garden Show, and the Golden Harvest Festival at Beaver Lake Nature Center. A variety of recycling information was distributed including blue bins, recycling instructions, battery bags, household hazardous waste sign-up, and compost-site sticker sales. Over 25,000 people were contacted through these events.

■ ***Recycling Containers***

Recycling containers were distributed to hundreds of schools, businesses, restaurants and parks to encourage separation and recycling of paper and beverage containers. (Pictured left).

In late 2005, OCRRA selected a vendor to provide 180,000 new blue bins to the community over the next two years. By the end of the year, approximately 110,000 of the bins were delivered and a third had been distributed to local towns and villages, and the City of Syracuse. Two bins are better than one!

■ ***Earth Day***

OCRRA ran numerous print and radio ads promoting OCRRA's Earth Day litter clean up on Saturday, April 22nd. The event enjoyed excellent community support, with over 110,000 pounds of litter and 1,000 tires collected by thousands of volunteers in 230 community groups.

■ ***America Recycles Day***

OCRRA participated with the NYS Steering Committee supporting the national America Recycles Day on November 15 that promotes the purchase of products made of recycled materials. OCRRA Recycling Specialist, Kristen Lawton, is one of the judges with the difficult job of selecting Poster winners from among entries submitted by the State's school children.

Beyond these noteworthy activities, a host of other services continued to be provided through the recycling program, including the following:

- ✓ Provided a recycling drop off six days/week, year round for mandatory recyclables at the Agency transfer stations. This service includes a no-charge drop-off for household scrap metal and office paper from small businesses.
- ✓ Coordinated a curbside collection of phone books during a six-week period that coincided with the distribution of the new Verizon phone book. Verizon Yellow Pages and Alltel provide free space to OCRRA to run its recycling instructions in the back pages of their phone books.
- ✓ Expanded its web site activity with emails to thousands of businesses and residents with handy recycling reminders and offers to contact the Agency for recycling assistance.
- ✓ Operated an automated hotline answering common recycling questions; twenty-four hours a day, seven days a week.
- ✓ Submitted grants to support a variety of Agency programs, including advertising and public education, household hazardous waste collection, computer recycling and recycling personnel costs.
- ✓ Participated in solid waste associations; All members of the Agency's recycling team are members of the New York State Association of Recycling, Reduction and Reuse (NYSAR³); the Agency's Recycling Operations Manager, Jeff Cooper, is the President of the NYSAR³ Board.
- ✓ Expanded our e-mail list to over 7,500 addresses;
- ✓ And proudly, the OCRRA recycling department completed 2006 with zero time lost due to work-related accidents.

OCRRA's recycling team members are:

- Andrew Radin, Director of Recycling & Waste Reduction,
- Jeff Cooper, Recycling & Waste Reduction Operations Manager,
- Justin Rudgick, Kristen Lawton and Douglas Grady; Recycling Specialists,
- Elaine Van Avery, Recycling Educator (Contracted Service Provider),
- Tom Monty, Compost Site Technician, and
- Our seasonal Compost Site gatekeepers.
